Things to remember :

- The purpose of this project is to help you experience real-world environments. Avoid relying completely on AI, as it defeats the learning objective.
- The report should be based on your own observation, interaction, and understanding during the visit.
- Ensure the font size and formatting are consistent throughout the document before submission.
- Maintain clarity and neatness in your writing. Avoid unnecessary complexity.
- Write in simple and clear language instead of copying technical definitions.
- Do not copy content from friends or the internet. Original work is expected.
- Include relevant photographs .Avoid unrelated images.
- Respect the organization's rules during your visit and while using any information.
- Submit the project on time as per given instructions.
- Focus more on what you learned rather than making the report lengthy.
- Properly check for spelling and grammatical errors before submission.
- Keep the project well-organized and properly structured.
